

1 kWh of wind power kits (chilovatt-hour) to an exceptional price of € 2,300.00 + vat

We manage to have this very competitive price, because about once a year we can win the contract for one lot on favorable terms from the manufacturer.

This is a special kit with unique technical characteristics, which we list below.

The kit includes: neodymium permanent magnet generator of 15 pounds.

3 blades by 145 cm, new aerodynamic design. Start to 2.5. mts (meters per second) 's single market.

Inverters to be connected to 220-250 volt network.

regulator

discharger

The installation and easy to learn. We provide all the instructions in this regard, the kit is designed for the do-it-tea.

I remember that even if it seems small, in a windy site produces 24 kW (Chilovatt) per day!!

With the 'net connection can take advantage of incentives, basically you pay the 0.30 kilowatt, twice as much as you normally pay in the bill, which is 0.15 per kw.

Free energy for 25 years is the average lifetime of a wind turbine this.
